

Five Holes In My Head

Directions: In the box by each set of pictures, write a multiplication number sentence that will tell you how many holes are in each group's heads. The first one has been done for you.

I like the number five.
 It reminds me of the holes in my head.
 When I've got to multiply,
 I think about the holes in my head.
 (Two ears + two nostrils + one mouth = five holes)

$$1 \times 5 = 5$$
